PROBLEM 5 : Black screen .....	10

# PROBLEM 1

## Description of the problem

---

When launching the software an error message appears :

**There is a connexion problem between the platform and the PC.**

The system is ready to work when both green and red light are on :

If one or both lights are off :

## Solutions

---

**Solution 1** : Check connexion cable and screw the usb connector on the platform.

**Solution 2** : Check the USB cable is plug on the USB port of the PC used first (during installation platform).

Be careful if you use a different USB port you must reinstall the driver on this port.

**Remark** : If both lights are on but the error message still appears contact your distributor.

# PROBLEM 1

**Solution 3** : Check driver platform is installed in “device manager” of Windows :

You’ll find it in “Universal Serial Bus Controllers USB” sub-menu : « Podometer MC Board »

# PROBLEM 2

## Description of the problem

---

### The PC crash when you plug the platform.

## Solution

---

Unplug all USB devices , now you can plug the platform.

# PROBLEM 3

## Description of the problem

---

When launching the software an error message appears :

**You have a problem in the database files.**

## Solutions

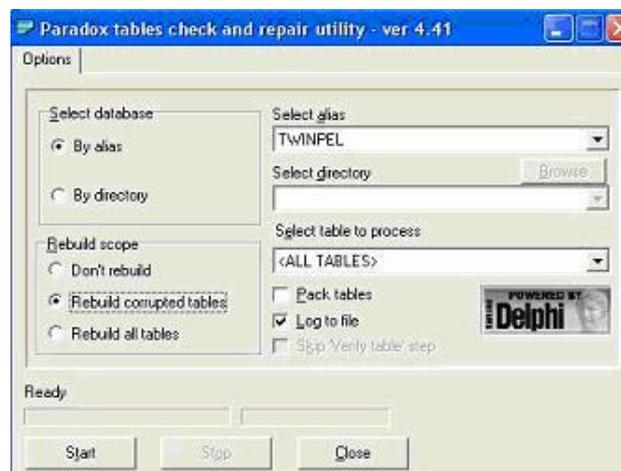

---

**Solution 1** : If your PC runs with Windows Vista turn off “user account control” as indicated in the installation manual.

**Solution 2** : The database is out of order. To repair it :

Run « Repair database » in «Medicapteurs » folder  Repair Database

Please parameter the “repair” window as shown : **Do not fill « Pack tables »**

Click on « Start » : “repair” check your database.

# PROBLEM 3

At the end check the final message.

**If the message is :**

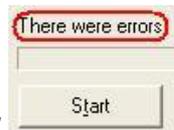

Your database is ready to work.

## **Remark :**

You can zip your database.

To do it fill the « pack tables » box and click « Start ».

**Be careful all database files must be repaired before zipping them.**

**If the message is :**

Click on « start » button again.

The message is still « There were errors », your database cannot be fixed :

You have to install again the software with a blank database and then import a save of the database as discribed in the installation manual in the paragraph “Medicapteurs database import”.

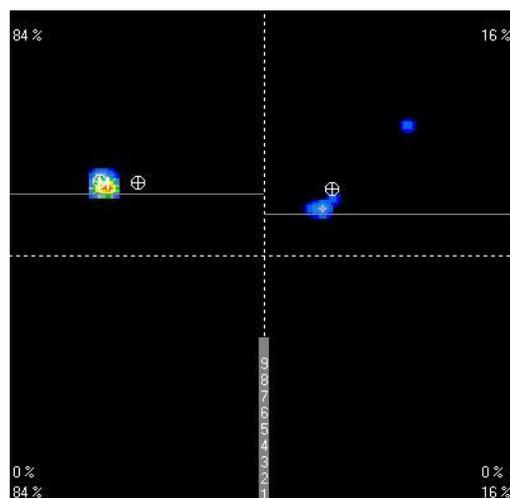

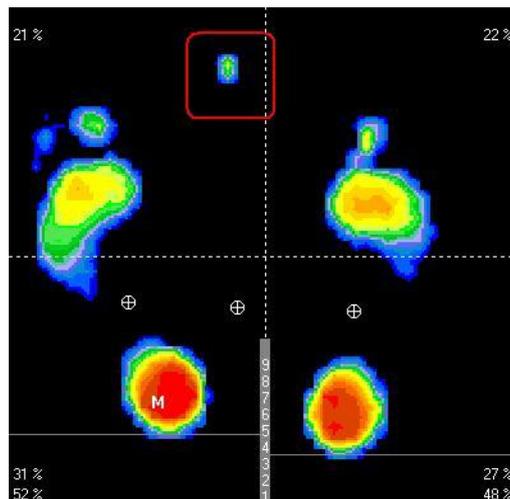

# PROBLEM 4

## Description of the problem

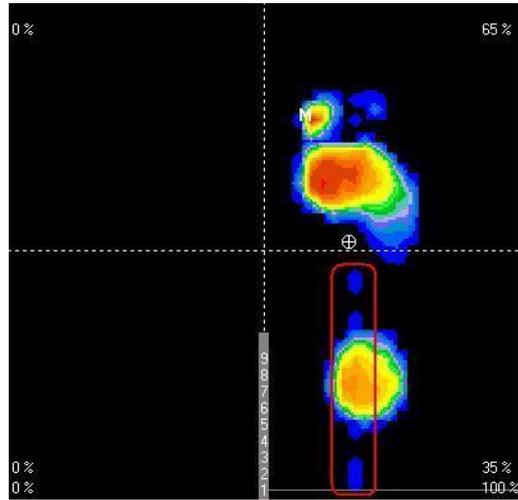

---

### Parasits points or lines

If you see these problems :

# PROBLEM 4

Please Contact your distributor.

# PROBLEM 5

## Description of the problem

---

### **Black screens**

Acquisition window stays black, feet not displayed on screen.

## Solutions

---

- A) Close the software and open it again.
- B) See in paragraph « Computer settings » of the installation manual how to deactivate USB root sleeping system.
